# SECURE THE RELIC

## THE BATTLEFIELD:

Place a marker at the center of the table. This is the Relic. Players then roll off with a d6. The player who rolled the highest also rolls for the deployment map and chooses his/her Deployment Zone.

## DEPLOYMENT:

Players roll off with a d6. The player who rolled the highest also rolls for the deployment map and chooses his/her Deployment Zone. The player who did not choose the Deployment Zone places the first unit. Players then alternate placing units one at a time until their entire army is deployed.

## FIRST TURN:

Players roll off. The player who finished deploying first receives a +1 to this roll. The winning player may choose to go first or second.

The player going second may choose to Seize the Initiative on a d6 roll of a 6+.

## BATTLE LENGTH:

At the end of Battle Round 5 the player who went second rolls a d6. On a 1-2 the game ends. At the end of Battle Round 6, the other player rolls a d6. On a 1-3 the game ends. On a 4+ the game continues for a final Battle Round. The game ends at the end of Battle Round 7.

## VICTORY CONDITIONS:

### PRIMARY OBJECTIVE:

**The Relic:** An infantry model can carry the Relic by moving into contact with it - that model then automatically picks it up. From that point, the Relic remains with that model (move the Relic marker with the model to show this) until it is dropped, which only happens if the model is slain or flees. A model with the Relic cannot embark in a transport, leave the battlefield, or move further than 9" in any single phase for any reason.

**Scoring**– Carrying The Relic at the end of the game is a Crushing Victory. If the Relic is not being carried, then the player with a model closest to the Relic wins a Minor victory. If both players have models equally close to the Relic, then the battle ends in a Draw.

Draw – Both Players scores 3 Battle Points

Minor Victory – The Victor scores 6 Battle Points,

Crushing Victory – The Victor scores 10 Battle Points, Opponent scores 0 Battle Points.

### SECONDARY OBJECTIVE:

Modified No Mercy (Kill Points). Total the Power Level of each army. Completing this objective will be based on the percent of Power Levels eliminated.

**Scoring**– Players earn Battle Points based on the percentage of Power Level of units they completely destroy in their opponent's army. Both players can gain max points for this objective. Points for the tiers below are cumulative to total 6 (1+2+3=6).

1-10% - Earn 1 Battle Point

11-45% - Earn 2 Battle Points

46-100% - Earn 3 Battle Points

### Bonus Points:

**Slay the Warlord:** If the enemy Warlord has been slain during the battle, you score 1 battle point.

**First Blood:** The first unit, of any kind, to be destroyed during the battle is worth 1 battle point to the player it doesn't belong to. If units from both players' armies are killed or removed from play simultaneously, then both players get 1 battle point.

**Linebreaker:** When the game ends, if you have at least one model fully within the enemy's deployment zone (meaning it's base, or the entire model if it has no base), you score 1 battle point for this objective.
